

Too many sales calls cause problems. If I get too many I just disconnect the phone so I can get some rest. This is why some restrictions should be placed on telemarketers. They have to make a living but they can call those that choose to accept their calls. Also, (medical electronic note) , the rf from handheld phones goes to antenna near brain. Put the antenna elsewhere like sticking down from the mouthpiece. Like a Star Trek communicator. Certain freqs of microwaves cause brain cancer! Do web search for info.
